

Employee Management System

Source Code Submission

Project: Employee Management System

Technology: Node.js, Express.js, EJS, JavaScript, JSON, Cypress

Source Code Repository

The complete source code for this project is available in the following GitHub repository:

GitHub Repository:

<https://github.com/kyyhud/employee-management-system>

The repository includes:

- Node.js and Express application code
- EJS view templates
- CSS styling
- JSON data files
- REST-style CRUD API routes
- Cypress end-to-end tests
- Postman testing screenshots
- Project setup instructions
- README documentation

Running the Project

After cloning the repository, install the project dependencies:

```
npm install
```

Start the Express server:

```
node app.js
```

Open the application at:

```
http://localhost:5000
```

Project Summary

The Employee Management System allows users to sign up, log in, view employee records, add employees, update employee information, and delete employee records.

Employee and login data are stored in JSON files using the Node.js fs module. The project also includes REST-style API endpoints tested through Postman and browser-interface testing through Cypress.
